

Count on our contribution

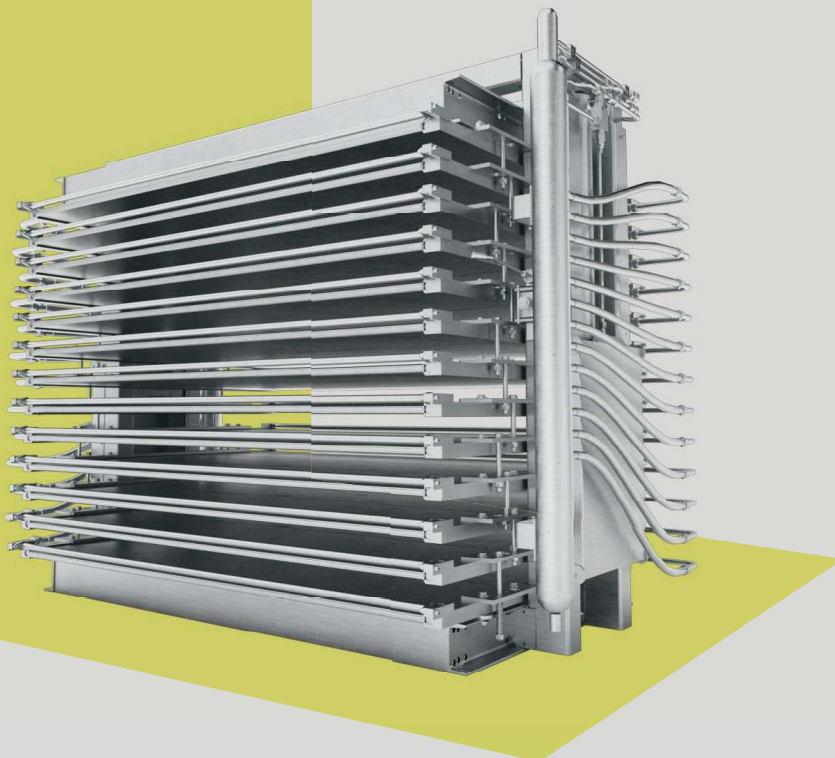

continuous freezing with increased **productivity**

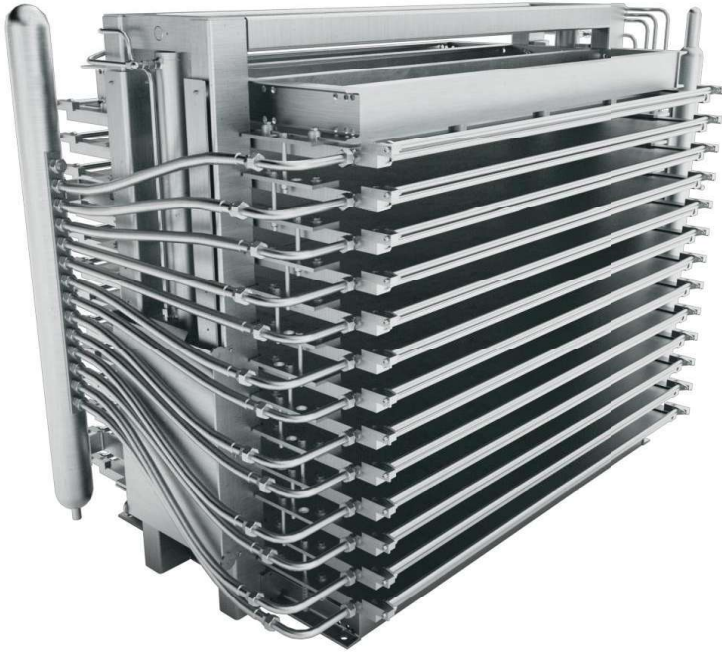

horizontal
H freezer

The horizontal plate freezers in the H series feature a heavy-duty, hot-dip galvanized steel frame or a frame in stainless steel as well as hydraulic rams that ensure a stable and even plate pressure for homogeneous freezing.

The H freezers feature optimum plate sizes and customized widths and lengths, a unique design with single station openings, low power consumption as well as easy cleaning and maintenance.

Direct and double contact freezing guarantees fast freezing resulting in high product quality and better yield.

reducing **kW** consumption and **manual labor**

- Optimum plate size
- Unique design
- Low power consumption
- Easy to maintain and clean
- Manual operation
- Corrosion class 5C
- Element surface structure prevents dents and marks in the packaging
- Fast low temperature freezing
